

Gatik Alagh

📞 967-104-5610 — ✉ gatikalagh39@gmail.com — 🔗 LinkedIn — 🐙 GitHub — 🚀 LeetCode

Professional Summary

A passionate and hardworking individual with a resilient, never-give-up attitude, always open to new ideas and flexible in accepting different perspectives. Enthusiastic about exploring new technologies.

Technical Skills

Languages: C, C++, Python, HTML, CSS, JavaScript
Frameworks: React.js, Tailwind CSS, Node.js, Express.js
Database: MongoDB, SQL
Tools: Git, Github, MySQL, MongoDB, Data Structures, Algorithms
Technologies: Machine Learning, Python Libraries
Soft Skills: Communication, Teamwork, Leadership, Creativity, Problem Solving, Analytical Thinking.

Projects

Backend – E-commerce Website

- **Technologies:** Node.js, Express.js, MongoDB, Postman, JWT, Nodemailer
- Developed scalable backend APIs for a fully functional e-commerce platform following MVC design principles.
- Implemented secure user authentication and authorization using JWT. Included login, logout, password reset, and change password features.
- Designed RESTful CRUD endpoints for user, product, and order management with proper input validation and error handling.
- Integrated Nodemailer to send emails for password recovery and account verification.
- Created modular controllers and routers for user, product, and order services.
- Used Postman extensively for API testing, ensuring robust request handling and error management.
- **GitHub Repository:** github.com/Gatik4321/Backend-of-Ecommerce-Website

Bank Fraud Detection Using Machine Learning

- **Technologies:** Python, Machine Learning
- **Model:** Random Forest Classifier
- Trained on Kaggle dataset with 280,000+ entries to classify transactions as fraudulent or legitimate.
- Achieved over 99% accuracy in detecting fraudulent activity.
- **Publication:** Published in Wiley Online Library

URL Shortener

- **Technologies:** Node.js, Express.js, EJS, MongoDB
- Built a dynamic URL shortening platform with secure redirection and user-specific URL management.
- Implemented authentication, password encryption using bcrypt, and CRUD operations on shortened URLs.
- Followed MVC pattern for clean code organization and maintainability.
- **GitHub Repository:** github.com/Gatik4321/URL-Shortener

Spotify Clone

- **Technologies:** HTML, CSS, JavaScript
- Created a responsive web application mimicking Spotify's UI with music playback features.
- Built an intuitive and interactive user interface to improve usability.
- **GitHub Repository:** github.com/Gatik4321/spotify-clone

Achievements

- Solved 500+ DSA problems across platforms like GFG, CodeStudio, LeetCode.
- Earned 40+ topic badges in DSA on CodeStudio.
- Published a research paper on fraud detection in the Wiley Online Library.

Education

Intermediate (Non-Medical), CBSE

Baba Ram Das Vidyeeth, Karnal

B.E. in Computer Science – AI & ML

Chandigarh University

2022

Score: 88.4%

2022 – Present

Current CGPA: 8.37 / 10

Certifications

- Microsoft – AI Azure Fundamentals
- Coursera – SQL: A Practical Introduction for Querying Databases
- Coursera – Python for Everybody
